Order a WinTest® Upgrade with your Year-end Funds and Save

Many organizations have extra funds at the end of a calendar year, and they are lost if they are not put to use. If you are one of these organizations, consider purchasing a WinTest® 4.0 upgrade package now to take advantage of \$4,500 in package savings for WinTest 4.0 software and a Bose® Calibration and Support Plan.

If you order your package now, you can take delivery whenever you are ready. To obtain a quote, [click here](#).

WinTest® 4.0 Software Features

The new WinTest 4.0 software includes 4 important test features for test engineers and system operators:

1. TuneIQ™ Control Optimization Software, which uses advanced Bose proprietary algorithms to simplify the tuning process and provide excellent recreation of desired waveforms;
2. Controlled Stop, which can eliminate the rapid motion that can be associated with testing certain specimens to failure;
3. Specimen Insertion and Removal, which provides preset buttons to allow the user to set the position of the system for insertion of a sample or to predefine a contact force;
4. Reverse Data Retention, which allow users to automatically collect timed data during the last cycles prior to test shutdown.

For additional information on the new capabilities of WinTest 4.0 software and the benefits they provide, please [click here](#).

The Bose® Calibration and Support Plan

Yearly system calibration and technical support are important factors in maintaining efficient testing and accurate results. The Bose Calibration and Support Plan, renewable annually, provides continuous protection of your instrument investment, and includes the following services;

- Annual calibration and inspection at your site by a specially-trained Bose Field Service Engineer;
- WinTest software upgrades to insure that your test instrument capabilities are fully up-to-date;
- Factory technical phone support for assistance with both simple and complex test setup and control situations;
- Preferred scheduling of on-site and factory services;
- One factory training seat coupon to address the need for ongoing training or ramping up a new operator;
- 5% discount on all accessory products and services.
